

9th European SEEG Course

« SEEG in lesional epilepsies: is the lesion guilty until proven innocent? »

Tuesday, February 27, 2018

13:00	Welcome buffet
15:15-15:30	Introduction (S. Francione, Milan)
15:30-16:15	Lecture 1. The spectrum of pathological substrates in epilepsy surgery patients (A. Becker, Bonn)
16:15-17:00	Lecture 2. Animal models of lesional neocortical epilepsies (A. Depaulis, Grenoble)
17:00-18:00	Welcome aperitif on the Skyroof
18:00-18:45	Lecture 3. Basic mechanisms of epileptogenicity in FCD (M. De Curtis, Milano)
18:45-19:30	Lecture 4. Basic mechanisms of epileptogenicity in brain tumors (G. Huberfeld, Paris)
19:30	Free evening

Wednesday, February 28, 2018

08:30-09:15	Lecture 5. Epileptogenicity and Ictal onset patterns of human FCD and DNET (F. Bartolomei, Marseille)
09:15-12:00	Cases 1-2 Phase 1
12:00-13:00	Debriefing
13:00-14:30	Lunch
14:30-17:30	Cases 1-2 Phase 2
17:30-18:30	Debriefing
18:30	Free evening

Thursday, March 1st, 2018

08:30-09:15	Lecture 6. Are nodular heterotopia always epileptogenic ? (F. Dubeau, Montreal)
09:15-12:00	Cases 1-2 Phase 1
12:00-13:00	Debriefing
13:00-14:30	Lunch
14:30-17:30	Cases 1-2 Phase 2
17:30-18:30	Debriefing
18:30	Free evening

Friday, March 2, 2018

08:30-09:15	Lecture 7. Is the polymicrogyric cortex uniformly epileptogenic ? (L. Maillard, Nancy)
09:15-10:30	Cases 1-2 Phase 1
10:30-11:00	Debriefing
11:30-13:00	Cases 1-2 Phase 2
13:00-13:30	Debriefing
