

What WP4 achieved last year

- PROMAESIS

- Study protocol approved by all centers
- Ethics approval obtained by 13 centers (6 in pipeline)
- 40 electrode array: instruction file and video

- SCORE EpiCare-cloud

- Platform up and running (limitation: W10)
- File upload tested – it works
- The first study was initiated: IRA on PPR; 20 samples uploaded

What the WP4 is planning for next year

- PROMAESIS
 - Obtain ethics approval from all centers
 - Register the study on clinicaltrials.gov
 - Patient recruitment and data analysis
- SCORE EpiCare-cloud
 - Complete the first study on IRA (+ publication)
 - Design the next study

How would you like the attendees/ or the network to contribute

- PROMAESIS
 - Deadline for the centers who have not obtained ethics approval?
 - Get started with pt. recruitment!
- SCORE EpiCare-cloud
 - Complete scoring (before the deadline)
 - Suggest new study using the platform (IRA / joint data analysis / collection of rare conditions)
