

Use of the website

The main intention of this website is to provide a database for the entry and evaluation of neuropsychological test results as well for the assessment and monitoring of behavioral comorbidities of the epilepsies.

Use for clinical use

For clinical use, after data entry, reports can be written and printed and stored in a local data file.

Data security

After printing of the report sheet, patient data are pseudonymized; name and date of birth are deleted and substituted with a consecutive ID. Thereafter the data are stored on a secure webserver and they are only accessible and downloadable by those who have entered the data.

Informed consent

Written informed consent must be obtained from each patient who is entered into the database. A positive votum of the local ethics committee must be obtained.

How to access/ request access to [E-Neuropsych.](#)

It allows users to access the database and create and/ or edit neuropsychological data sets.

1. Send an Email to Julia.Taube@ukbonn.de with the following information:
 - a. Name of ERN institution:
 - b. Name of responsible person:
 - c. Position of responsible person:
 - d. IP address* (of the computer you will use to access E-Neuropsych):
2. You will receive an Email from our programmer with your login information.

*We need the IP-address since your account will be linked to the IP-address and access to the website will only be available for the given IP-address.

For instructions on how to use the tool please refer to the introductory video on the website.
