

ACCELERATING PATIENT INVOLVEMENT IN EUROPEAN EPILEPSY RESEARCH

6 October 2021 | 9:30 - 13:00 CET

PROGRAMME HIGHLIGHTS:

Understanding the potential of PPI in epilepsy research.

Understanding how epilepsy researchers and people affected by epilepsy can work together to produce more impactful research.

Envisioning the way forward: how to incorporate patient involvement into epilepsy research so as to fundamentally change the way policy-makers, funders, and regulators view epilepsy.

This event is designed to encourage researchers to learn about PPI and start integrating it into their research programmes. It is relevant to students, postdocs and faculty.

People with lived experience of Epilepsy interested in getting involved with research teams are welcome to attend.
