Graphic identity

Logos

Provide at least as much clear **space** around the logo as displayed above. This helps our logo appear clearly.

Monochromatic - background color may change. To be used on dark backgrounds exclusively.

Colors should be strictly respected:

orange: #C7600D

blue: #505984

gray : #A2BAD3

This format can be used without the name only when a round image is needed

This logo represents EpiCARE and should be used in all communication / presentation. It can be paired with the ERN / co-funded by the EU logo:

Co-funded by the European Union

The logo is not to be altered or deformed in any way. It must appear exactly as shown: the elements, proportions and relationships must not change, and it should not be presented in any orientation other than horizontally. The colors codes showed above must be respected.

Colours

Logo

Website

These colors can be used for titles and highlights in presentations. We recommend to use no more than 2 colors, to keep the presentations clear and easy to read. Text should always be in black or dark blue, on a white background.

On the website, hypertext links should be in orange and underlined.

These fonts can be downloaded on fonts.google.com, but they are available on all the main text editors and websites. They should not be mixed in the same document. Nunito is used on the website, Manrope for the newsletter and Noto Sans for other communications. If neither font is available, Arial is the replacement.

Other

EpiCARE is written in uppercase for the first letter and "care".

The website should be linked when EpiCARE is mentioned : epi-care.eu.

When you mention EpiCARE in an event, on a paper, during a conference or workshop, please let the coordination team know.

If you have any question regarding EpiCARE's graphic identity or logo use or any communication topic, please do not hesitate to contact Anne, Communication manager: a.robert@epi-care.eu
