

A pioneering MSCA Postdoctoral Programme at the University of Eastern Finland (UEF) in Finland

NOVEL offers 14 postdoctoral fellowships in brain health research across different disciplines with the opportunity to design your own research project for 3 years.

The world needs novel solutions to address brain health challenges that impact individuals and society. Research is needed to support early prediction, personalized treatments, advancements in methods and technologies, and the development of responsible innovation and ethical approaches.

To address this, NOVEL focuses on pioneering research in brain health. We combine expertise in **neuroscience, data science, innovation management, health economics, and legal studies.**

1st Call

Opening Date:
March 1, 2025
